Objections To Drawing

The drawing in this case is objected to under 37 CFR § 1.83(a) for failing to include all pertinent features described in the claims. The present drawing fails to show any connection between a waste heat utilizer and a single stage membrane as specified in claim 8, and the drawing further fails to show any connection between a refrigeration device on an air fractionation installation and a single stage membrane as specified in claim 9. If applicants persist in claiming these features, they are required to submit a new, replacement drawing figure properly showing the omitted subject matter. Any such new figure must be submitted in response to this Office action.

Claim Rejections - 35 USC § 112

Claims 1-10 are rejected under 35 U.S.C. § 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicants regard as the invention.

Claims 1-10 are incomplete for omitting essential structural cooperative relationships of elements, such omission amounting to a gap between the necessary structural connections. See MPEP § 2172.01. The omitted cooperative relationships involve the

heat sink recited in claim 1, line 4. The claims fail to specify the intended purpose of the heat sink and/or how it is used in cooperation with the other recited components.
